

# ENGAGE 2.0

The Virtual Connect : Webinar Series

**07-11th Mar' 2022**

## What is **ENGAGE**?

SteelMint's **ENGAGE** is a week long webinar series and a virtual platform for exchanging ideas and viewpoints on global steel and raw materials.

## What to expect from **ENGAGE 2.0**?

**Sessions**

**Minutes of Knowledge  
Sharing**

**Speakers**

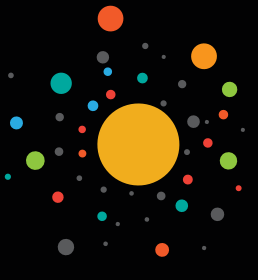

**Industry Verticals**

**Iron Ore | Coal & Coke | Scrap & Recycling | Steel  
Ferro Alloys & Graphite Electrode | Carbon Emission**

**07-11th Mar' 2022**

# ENGAGE 2.0

The Virtual Connect : Webinar Series

07-11th Mar' 2022

**SteelMint**<sup>®</sup>  
Events

## Tentative Session Outline

### Steel

- Indian steel market outlook - H1 FY23
- Indian steel pipes and tubes market outlook - H1 FY23
- Growth prospects for India's renewable energy market in FY23
- India's secondary steel sector - perils & opportunities
- Changing trade dynamics of global steel market
- SE Asia steel market outlook - 2022
- Key drivers of Chinese steel market in 2022
- Steel Futures

### Coal & Coke

- Impact of coking coal prices on global steel industry
- Will global thermal coal prices stabilize in 2022?
- Emerging trends in met coke trade dynamics
- Challenges and opportunities for pet coke utilization in India

### Ferro Alloys & Graphite Electrode

- What to expect from the Indian ferro chrome industry in 2022?
- Growth prospects for graphite electrodes consumption

### Iron Ore

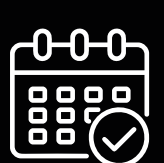

- Developments in Indian mineral Policies & way forward
- Growing importance of pellet feed in India's steelmaking
- Indian iron ore production scenario in CY22

### Scrap

- How will scrap generation from ELV pan out in next 5 years?
- Near term outlook on global ferrous scrap prices
- Change in global ferrous scrap trade flow

### Carbon Emission (Technology)

- Cutting emissions in IF steelmaking
- CBM/CCUS Tata Steel
- Recycling scrap - ELV or sorting?
- Coal gasification - JSPL (DRI industry), CIL
- Hot blast temperature in BF, coke usage to minimize

07-11th Mar' 2022
